

For small to  
medium-sized  
businesses.

The right place to begin  
accounting for your  
business.

The powerful and flexible accounting solution.

The combination of ease-of-use, innovation and flexibility makes Pastel Partner the perfect solution for small to medium sized businesses. Suited to a multi-user environment, and the mainstay of over 200,000 businesses worldwide for over 20 years, Pastel Partner allows you to add modules to your core accounting application as your business grows.

## [ Drill Down ]

Pastel's drill down functionality allows you to click on an item from any report and see further details. No more navigating cumbersome reports or having to go backwards and forwards to retrieve information. Simply click on an item whilst in your report and drill down to the information you need.

## [ The System Navigator and Explorer ]

Pastel Partner lets you find your way around the system using either the System Navigator or Pastel Explorer. On Explorer, the 'Tasks' option in the left panel allows quick and easy access to lists of customers, suppliers, inventory items and general ledger accounts.

The Explorer allows you to easily add, edit and delete accounts, enquire about and find customers, suppliers, inventory items and general ledger accounts, invoke processing screens directly from the item selected, export lists to Excel, as well as group and filter data.

The 'To Do List' option shows notes due and overdue post-dated items, customer and supplier invoices, expiring quotations, sales orders due for delivery and incoming purchase orders.

## [ PDF Printing and E-mailing ]

This standard feature allows e-mailing of documents such as statements, invoices, orders and quotations in PDF and HTML format. Each document layout has a corresponding PDF layout. The e-mail screen allows you to cc and bcc recipients and contacts from Outlook.

## [ Microsoft Office Integration ]

### Microsoft Windows 7 compatible

Pastel Partner is compatible with Windows 7, having passed Microsoft-designed tests for compatibility.

### Microsoft Office

Integrate your general ledger, customer and supplier data with Microsoft Office, and export customer and supplier contact information into Outlook. The 'Create Letters' and 'Labels Assistant' allows you to easily set up mail merge documents and labels through Word, automatically creating the required data sources and links. \*Microsoft Office 2000 and later required.

## [ Customers ]

Pastel's flexible customer account setup allows you to configure parameters per customer. For example, you can set individual trading and settlement terms, select the e-mail and/or print option for invoices and statements. Each customer can have multiple delivery addresses and user-defined fields. Create as many customers as you need - Pastel's high performance database won't slow you down as your customer base grows.

The 'Block Assistant' allows you to manage your customers and suppliers and 'block' them based on pre-defined criteria. Simply select the criteria, by payment terms, overdue days or overdue amounts for example, and Pastel will take care of the rest.

## [ Invoicing ]

Pastel allows you to enter invoices in a logical and intuitive manner. Save time, ensure accuracy and control back orders by linking quotations and sales orders. The 'Recurring Invoice Assistant' allows you to adjust selling prices dynamically. If you use this option, the system is able to determine the selling price on a per item basis, using the full selling price hierarchy. These prices are then used instead of the ones on the original recurring invoices.

## [ Suppliers ]

Pastel Partner's Automatic Cheque and Remittance Printing facility makes paying your suppliers a simple task. Select a range of suppliers and the payment date. Pastel displays any invoices due for payment in a table. You can edit payment amounts or choose not to pay specific invoices. Pastel automatically generates payments and prints the remittance and cheque for each supplier. In addition, Pastel can automatically incorporate settlement discounts for early payment terms.

## ADD-ON MODULES

## [ Inventory Items ]

Pastel Partner can track your inventory in as much detail as necessary. You can create product or service items, establish minimum and maximum stock levels and more. The Pastel Re-order Assistant can also create purchase orders for fulfillment. Pastel allows you to set customer-specific pricing, specify per item which discount types apply, and even set the maximum

cost percentage difference and minimum gross profit percentage. There is an extensive list of ready to run reports available, some of which include History Reports, Activity Summaries, Preferred Suppliers, Gross Profit. As your business grows and begins to demand more sophisticated features and functionality, Pastel Partner allows you to add the modules you need.

## [ Point of Sale ]

Among the many features available in Point of Sale, the fundamentals include full integration into the accounting back office, taking factors such as speed and ease of use seriously. The security features in Point of Sale help to prevent potential theft when cash changes hands. Also available as an offline option.\*

## [ Business Intelligence Centre (BIC) ]

Direct access to business critical information has never been this easy. The Business Intelligence Centre allows you to design standard reporting templates in Microsoft Excel and update these reports directly from Pastel at the click of a button. The BIC module dynamically links Pastel to Excel (a popular data manipulation tool) where your information can be viewed, manipulated, sliced and diced, to give you greater insights into your business. Access your free 90 day trial period and take advantage of this user-friendly, intuitive reporting tool.\*

## [ Bank Manager ]

Eliminate the need to capture transactions from your bank statement. Download an electronic bank statement from most major banks, map the transactions to the correct accounts and the system will automatically open the item and assign the transactions for you after each import. Reconciling your bank account has never been quicker or easier.\*

## [ Multi-Store ]

Set the prices in one store and copy these to other stores. Link users to one or more stores and prevent users from accessing items in other stores. Transfer items between stores using a Store Transfer Journal and print Transfer Reports.\*

## [ Serial Number Tracking ]

Keep track of individual inventory items that have serial numbers. You can track items from the moment you purchase or manufacture them until you sell them. You can continue to track them for warranty purposes, for instance if a customer returns an item for repair.\*

## [ Bill of Materials, Kitting & Manufacturing ]

Create Bills of Materials with an unlimited number of components. Three additional user defined costs are available for costs such as labour, overheads and buy-outs. Components are removed from stock at the time of manufacturing. A Kitting option allows you to link inventory items together, and when invoicing the kit item, the linked items are used.\*

## [ Cash Manager ]

Save interest or earn interest by reducing the average days outstanding on your debtors book. Use this product to help you spend more time calling for payments and less on reconciliations and reports. Record notes per customer per transaction on your age analysis and generate reports such as Chase Lists for follow up, Cashflow Forecasts, and Promise to Pay reports.\*

## [ Fixed Assets ]

With features such as an unlimited number of assets and multiple forms of depreciation, Fixed Assets helps you manage and track your fixed assets easily and reliably. Available as a stand-alone module, Fixed Assets is part of the Pastel Evolution range of software. Fixed Assets automatically creates batches of information that can be posted directly to Pastel Partner's general ledger, thereby avoiding duplicated data entries.\*\*

## [ Multi-Currency ]

Pastel Partner has full multi-currency processing which can define a currency for each customer, supplier and bank account.\*

\* Available as an optional add-on module to Pastel Partner Version 11.  
 \*\* Can be purchased as a stand-alone module.

**For over 18 years, Pastel has delivered the very finest in accounting software. Relied upon around the world, Pastel is always at the forefront of economic, legislative and technological developments. Make the right choice for your business with the trusted name in accounting software.**
