**TIME &
ATTENDANCE //**

SIMPLE, EFFECTIVE TOOLS TO
MANAGE YOUR WORKFORCE
BETTER

TIME & ATTENDANCE //

We'll help you choose the right hardware for your business and employees. From hand recognition, to fingerprints, to face recognition, we have the right technology for you.

HANDPUNCH 3000

The Handpunch 3000 captures a 3D image of the hand every time the employee clocks in.

No fingerprints or palmprints recorded.

There is no question - employees have to be there to clock in.

iCLOCK 680

The iCLOCK is our most popular device.

Employees can clock in with a fingerprint, PIN, or a combination of both, and the system links to door access hardware.

No timecards or fobs.

Our Time & Attendance systems give you the tools you need to measure, manage and eliminate persistent lateness in your business.

Spend less time managing absence, and more time on your business.

SOFTWARE THAT MAKES YOUR BUSINESS BETTER

By taking the clockings directly from the clocking machine, our intuitive software calculates employee hours, overtime, lateness, sickness and absence accurately, saving your payroll staff hours, while reducing the risk of payroll inflation.

How 5 minutes lateness affects your bottom line every month

Based on 5 minutes per day at minimum wage, 2 minutes payroll audit per week, and 2% error rate from manual calculation

From as little as **£15 per week**, you can reduce a host of time-intensive manual steps, reduce the effect of lateness on your business, and pay your employees fairly for the actual hours they work.

There really is no reason to manage time manually, when you can be seeing a return on your investment in Time & Attendance in as **little as two months**.

how we
work

At Keytime, we **believe in technology**. We've seen our customers transform their business with the right software and hardware, and we get excited about bringing that technology to your business.

We also believe that it is really easy to be blinded by impressive sounding technical language, so we make a conscious effort to say **no to jargon**. Instead, we focus on giving you the benefit of our experience in plain English.

Our Time & Attendance systems combine the latest biometric technology to ensure the most accurate timesheet production, saving you time & money. We would love to give you a **free of charge consultation**, where we can help you to choose the most appropriate technology for your business & budget.

Your business could be saving time, spending less on calculating wages, and benefiting from improved physical security. Why not call us, and see for yourself?
